

Supporting New Green Guidelines for Retailers

GREENBUSINESS, in conjunction with the Environmental Protection Agency, has published a useful set of guidelines dedicated to helping retail businesses reduce their costs, better manage their waste and limit their environmental footprint. Retail Ireland is delighted to have been asked to endorse the guide and it receives our full support.

The guide provides Irish retailers with the information, guidance and tips needed to reduce business costs by making small yet significant changes to how resources are managed, thereby also enhancing the green credentials of our industry.

The guide is aimed at all retailers, from large corporate chains to small independent stores,

and is an invaluable resource in helping businesses to reduce their energy, water and waste bills.

To access a copy of the guidelines, visit www.retailireland.ie.
